

Largest Number - 2

Problem Statement

Three friends — Aarav, Riya, and Kabir — each picked one integer. They want to know who picked the largest number among them.

Your task is to write a program that takes three integers as input and prints the largest one.

If two or more numbers are equal and largest, simply print that number.

Input Format

- The input contains three space-separated integers A, B, and C, representing the numbers chosen by Aarav, Riya, and Kabir.

Output Format

- Print the largest number among A, B, and C.

Sample Input 0

```
10 20 30
```

Sample Output 0

```
30
```
