

# Square Star Pattern Generator!

## Problem Statement

Noah is learning about pattern printing and wants to create a simple square-shaped star pattern for his coding practice series.

Your task is to help Noah by writing a program that prints a square pattern of stars (\*) with N rows and N columns.

## Input Format

- A single integer N, representing the number of rows and columns.

## Output Format

- Print a square star pattern of size  $N \times N$ , where each star is followed by a space.

## Sample Input 0

```
3
```

## Sample Output 0

```
* * *  
* * *  
* * *
```
