

Days conversion.

Problem Statement

Write a program to convert a given number of days into years, weeks, and days. The program should take the total number of days as input and calculate years, weeks and days. Assume:

- 1 year = 365 days
- 1 week = 7 days

Input Format

- A single integer representing the total number of days.

Output Format

Three space-separated values representing the equivalent years, weeks, and days in below format.

- Years: <yearValue>
- Weeks: <weekValue>
- Days: <daysValue>

Sample Input 0

```
400
```

Sample Output 0

```
Years: 1
Weeks: 5
Days: 0
```
