

First and Last Digit.

Problem Statement

Aakash is exploring patterns in numbers. He wants to know the first digit and the last digit of any given number.

Your task is to write a program that takes an integer **N** as input and prints its first and last digits.

Input Format

- A single integer N, representing the number.

Output Format

- Print two integers separated by a space:
 - The first digit of N
 - The last digit of N

Sample Input 0

```
1234
```

Sample Output 0

```
1 4
```
