

Full Pyramid Star Pattern !

Problem Statement

Olivia is learning about nested loops and pattern printing. She wants to design a beautiful pyramid of stars (*) that is perfectly centered.

Your task is to help Olivia print a **full pyramid star pattern** of **N rows**, where each row contains an odd number of stars and is centered with spaces.

Input Format

- A single integer N, representing the number of rows in the pyramid.

Output Format

- Print a centered pyramid star pattern of N rows, where each row's stars are separated by a single space.
