

Problem Statement

Andy is learning programming, and his teacher gave him a simple but important task. He needs to write a program that can tell whether a given number is Even or Odd.

- Andy knows that a number is Even if it can be divided by 2 without leaving any remainder.
- Otherwise, the number is Odd.

Now Andy wants your help to solve this problem. Write a program that takes an integer as input and prints whether the number is Even or Odd.

Input Format

- A single integer N, which represents the number given to Andy

Output Format

- Print "Even" if the number is divisible by 2.
- Print "Odd" if the number is not divisible by 2.

Sample Input 0

4

Sample Output 0

Even
