

Right Triangle Star Pattern!

Problem Statement

Liam is exploring geometric patterns in programming and wants to generate a right-angled triangle made of stars (*).

Your task is to help Liam by writing a program that prints a right triangle star pattern with N rows, where the first row has one star, and each subsequent row has one additional star.

Input Format

- A single integer N, representing the number of rows.

Output Format

- Print a right triangle pattern made of stars (*), where each star is followed by a space.

Sample Input 0

```
4
```

Sample Output 0

```
