

# Swap Two Numbers..

## Problem Statement

Riya and Aman are playing a number puzzle game. In one round, they each pick a number and write them down. Suddenly, Aman challenges Riya:

*"Can you swap my number with yours without writing a new number from outside?"*

Your task is to help Riya by writing a program that **swaps the values of two given numbers**.

## Input Format

- Two integers separated by a space (the numbers chosen by Riya and Aman).

## Output Format

- Two integers separated by a space, representing the numbers after swapping.

## Sample Input 0

```
5 10
```

## Sample Output 0

```
10 5
```
