Largest Number - 1

Problem Statement

Arjun and Meera are playing a number game. Each of them picks one integer, and they want to know who picked the larger number. Your task is to help them by writing a program that compares the two integers and prints the largest number.

If both numbers are equal, simply print that number (since both are the same).

Input Format

- The first line contains two space-separated integers A and B, representing the numbers chosen by Arjun and Meera.

Output Format

Print the largest number among A and B.

Sample Input 0

```
10 20
```

Sample Output 0

```
20
```
